

Enjoy a Safe Summer Season

Propane Gas Grill Safety Tips

- *Always use your grill outside in a well-ventilated area. Don't bring cylinders inside or into an enclosed space such as a garage.*
- *Before lighting your propane gas grill burner, use a leak-detection solution to make sure all connections are secure. Contact your local propane gas supplier to obtain the leak-detection solution and instructions on how to use it. Never use matches or lighters to check for leaks.*
- *Always use or store cylinders in an upright, vertical position. Store them outside and away from sources of ignition.*
- *When you have your cylinder refilled, ask your supplier to check for dents, damage, rust or leaks.*
- *After filling, take your cylinder home immediately. Keep your vehicle ventilated with the cylinder valve closed and plugged or capped (unless your cylinder type does not require plugs or caps). Never leave the cylinder in your car.*
- *Make sure the grill burner controls are turned off and keep the cylinder valve closed when not in use.*
- *Make sure the grill is shut off and cooled before covering.*
- *When your grill is not in use, cover disconnected hose-end fittings and burner air intakes with small plastic bags, or obtain protective fitting caps from your propane supplier to keep out dirt, insects and moisture.*
- *If there is a significant and uncontrollable release of gas or a fire, call the fire department immediately and move all people and pets away from the unit.*
